

The traditional methods of agriculture is slowly being replaced by scientific and technical methods. As a result of this the merits of the traditional methods have vanished.

The Agriculture University in Coimbatore and the M . S .

Swaminathan Research foundation are trying to fuse the traditional with the modern methods so as obtain maximum produce in the long run.

Some of the measures adopted are

- Micro - irrigation
- Integrated pest control management (IPM)
- Growing blue Algae and Azolla
- Precision farming through Remote

sensing, Geographical Information system and Global positioning system.
