Cloud Sherpas Asset Library in Summit

Thanks for visiting the new Asset Library in Summit. We'll get you acquainted and show you what's what in 3 quick slides!

The Asset Library is a new application in Summit that makes it easy for you to find and contribute valuable slides, code, solutions, and other assets created by you and your colleagues.

Each asset search result contains some basic info and functionality which make all the assets, easier to find, and easy to share on Chatter with other Sherpas

Cloud Sherpas Asset Library

- **BU Icons** indicate which BU the asset belongs too
- **"Like"** an Asset or "**Share on Chatter**" if you find it valuable or impressive
- If you used the Asset click "**Used on Project**" and add the project to the asset record
- The "**New",** "**Code**", and "**Attachment**" icons are non-functional and indicate basic info about the asset, i.e. whether it's new, has code, or has attached documentation
- **"Technologies"** and **"Tags"** can be easily searched and selected via autocomplete

Cloud Sherpas Asset Library in Summit

- The SFBU IP Contest will run through the Asset Library. Simply check off "Submit to IP Contest" when creating an asset if you want to enter the contest and win $500; or if you want to search through contest assets, check the filter box on the left.

- Analytics are enabled on the Library so we can track the most active users and contributors; eventually the Asset Library will be one component in establishing a larger gamification culture at Cloud Sherpas

- Being an active contributor is not that hard, really! It takes about 5-10 minutes to submit an asset. You need the following info: Author of Asset, short description, long description, tags/technologies, date published, associated BU, and projects the asset was used on. That is it!

Some Frequently Asked Questions...

What are Assets?
- Assets can range from Frameworks, Demo Orgs, Toolkits, Apps and Code, to Data Models, Deliverables, Templates, Sales Collateral, User Story Collections, and more!

Why Did We Build This?
- To make it easier for you to find & contribute valuable IP assets from projects and sales

Who Should Use the Asset Library?
- Both Delivery & Salespeople, although right now there are more Delivery Assets

But Isn't This Just Another *Thing/Place* We Have to Keep Track Of?
- Nope! To make it easier to use and let you access more resources in one place, the Asset Library lives in Summit and you can find all the assets from within Summit

So, What's the Knowledge Site Still For?
- The knowledge site is still the home for information about our Practice Areas, Sectors, Industry Frameworks, Methodology, and Training / Certification. Keep it bookmarked!
