THE DETAILS:

All of the odds on a roulette table are based on the “law of averages” The casino can only gain money from the player (being you) playing the table.

Until..... NOW!!!!!!

We have taken the “law of averages” and turned it into your advantage. Maybe the casino might catch on one day, but there are millions of people playing online casinos and only a small number of people who use this system.

It is 100% legal to use any strategy you wish as long as you don’t have any illegal software. And this strategy is your mind and a pen and paper... Thus being perfectly legit!

All casinos’ have an “Acceptable loss”, which means they can lose a lot of money before changing any gaming rules!

I have played at many online casinos and learned their systems inside and out. This system works best at this tested and tried casino. I seriously recommend that you only play at this one casino! **Using the blue clickable links provided, will make sure you have the correct software to use this system.**

For information on other casino software and programs, email me and I will provide you with a list. This one is by far the best!

Email me at Questions@easyfreeincome.com

This is a very trusted casino and will not cause your computer harm in any way. The money making software size is not large either, so do not worry about space.

[Automatically Download Money Making Software Here!](#)

[Click Here To Download From the Homepage Instead!](#)

(Use this option especially if you have a MAC, you will need the “instant play” area for some MAC’s)

This software is very safe and trusted (do not worry)

Once you click the download link, the automatic download will pop up to save you trouble. I set it up like that to make it easy for you.

If you chose to download from the home page then it will take you here:

click on

Click the “**save**” button, to save it where you want it on your computer, and then click “**ok**” or “**open**” on some computers.

It will start downloading (you can watch the process) Once it finishes the first part, click “**Run**” to install it to your computer, and make sure to click “**next**” wherever it asks you to.

Once the download is complete it will open to your casino software, and the registration will appear. Fill it out and press “create account” and then it will ask you to log in, and it’s that easy! (Make sure you write down your username and password!)

A screenshot of the 888 casino registration form. The form is titled "888 casino" in the top left corner. It includes fields for First name, Last name, Username, Password, Verify password, Security question (a dropdown menu), Security answer, Email address, Date of birth (dd, mm, year dropdowns), Gender (Male/Female radio buttons), Country (Canada dropdown), Residential address, City / Town, Province (dropdown), Postal code, Phone / Mobile number (+1), and Bankroll currency (dropdown). There are green question marks next to each field. A "Check availability" link is next to the Username field. At the bottom, there is a checkbox for "I'm over 18 years of age and I accept these Terms & Conditions." and a green "Create my account!" button. In the top right corner, there is a link for "Already a member? | Help".

(Don't worry about them selling your email address; they are a very reputable company and don't need to do things like that.)

OK here you can either choose practice play or money play. I recommend just going straight to money play, considering you don't have to bet any of your own money, and you will always win.

GET READY FOR EASY MONEY!

So now your all logged in and ready to try it out , if you are not logged in then enter the user name and password you received when you registered and hit LOGIN.

A screenshot of the 888 casino login interface. The background is dark. In the top left corner, the '888 casino' logo is displayed in green. Below the logo, there are two white input fields: the first is labeled 'Username:' and the second is labeled 'Password:'. Below the password field is a green checkbox with the text 'Remember me' to its right. A blue 'Login' button is centered below the checkbox. At the bottom of the form, there are two green links: 'New User? Sign Up Here!' on the left and 'Forgot your Password?' on the right. At the very bottom, there are two circular buttons: a green one with a white 'X' labeled 'Cancel' on the left, and a green one with a white question mark labeled 'Help' on the right.

**YOU'RE HALF WAY TO A BIG HUGE SMILE!
AND BIG HUGE BANK ACCOUNT!**

OK now you're registered and signed in. The only thing left is to deposit money to become a real player. I recommend you deposit \$200 (£113) since the casino has a bonus match of 100% up to \$200, so that means if you deposit \$200 they will also give you \$200 for a bank roll of \$400, hence the reason you do not have to bet any of your own money!

This is one of the reasons this casino is so good, the bonus money is also directly deposited into your account, no waiting like other casinos!

If you can't afford \$200, at least deposit \$150 (£80), which will still give you another \$150 for free, for a total of \$300. For this system to work you need a bank roll of at least \$300 to start.

You can automatically withdraw your initial deposit, but I recommend leaving it in there as "sitting money" The casinos favor players with "sitting money" and I truly believe I have done better because of that fact. With this system you do not HAVE TO lose a single penny of your money! Also in case you make a mistake and lose your \$200 bonus you will still have your initial deposit to keep going. You have nothing to make but money from there onwards, its 100% safe. Please leave some sitting money to guarantee your results.

I will explain further how to deposit money into your casino account after I explain how the system works!

THE SYSTEM

The Key To Your Success

This system is based on betting in a sequence, with the numbers I have analyzed and prepared for you. They have been tried and tested many times and are the best set of numbers for your advantage. Please do not ever change these numbers without emailing me for advice!

The system you will be using is based on these betting terms: **HIGH/MIDDLE/LOW**

You will be betting on one of these fields **H/M/L** with a slight increase in the stake, until it comes up.

Keep reading...trust me it works!

You will be placing bets with winnings of 2:1, so that means if you bet \$1 you get \$3, with a profit of \$2 because the original \$1 was yours.

Bet \$5...make **\$10**

Bet \$10...make **\$20** and so on.....

By the “law of averages” these fields have a 1 in 3 chance of winning, and with my system you only need 1 in 19 spins, which has given you **160%** chance of winning and have given yourself an unbeatable advantage!

That’s right, you have more than quadrupled your chance of winning! (And I always do)

Defeat the “law of averages”!!

There is a HELP menu in the roulette game to help you understand how to play.

[Understanding How To Bet:](#)

You will have 3 fields to watch for and bet on.

These are called “Dozen Bets”

1. This is a bet on LOW with the numbers 1-12 .
It looks like this: 1ST 12

You win if the ball falls on one of these numbers.

2. This is a bet on MIDDLE with the numbers 13-24.
And looks like this: 2ND 12

You win if the ball falls on one of these numbers.

3. This is a bet on HIGH with the numbers 25-36.
And looks like this: 3RD 12

You win if the ball falls on one of these numbers.

Follow these directions exactly and you will increase your bank account by \$1 to \$3 in the **beginner** part of this system and \$4 to \$20 in the **advanced** part of this system, with every win you have, regardless of how many losing ones. The number sequence is perfectly calculated so that it always adds more money for each spin, to make up for the loss of the previous spin, plus some so you always win!

OK now grab a blank piece of paper and a pen. I use a book of blank lined paper, so I can keep using it until its full.

You are **not** going to bet anything right now. You are just spinning the wheel and watching and recording what drops into the wheel. You are looking to record whether the ball drops in HIGH (H), MIDDLE (M), or LOW (L).

Bet only how I tell you to, never bet at random!

Start recording on a piece of paper what comes up...
looking for a consecutive run of 7 spins where a certain
field does not come up, of either H, M, or L. (Remember
you are not placing any bets at this time, just spinning.)

For example, these numbers fall in:

34, 33, 20, 18, 12, 25, 6, 15, 13, 22, 9, 4, 3

Your notes on a piece of paper will look like this:

H, H, M, M, L, H, L, M, M, M, L, L, L

As you can see, there is a consecutive run of 7 spins and the
HIGH (H) field has not come up. Its time to start betting!

If you understand that, skip the next paragraph!

Further example:

If you count backwards from the last letter in that run (row of letters) you
will count 7 letters, all being either L OR M, but yet there is no H. So when
this happens you need to start betting. But until this sequence happens you
do not need to bet, just spin and record. You only bet on one of these three
fields if it has not come up for 7 spins, and then you continue betting on it
until it does. Remember if you have any questions email me at
Questions@easyfreeincome.com and I will help you with any questions! Or
read the “commonly asked questions” book on the download page!

Proceed:

Spin #	Bet This Much	You Make
8.	\$1	\$2
9.	\$2	\$3
10.	\$3	\$2
11.	\$4	\$2
12.	\$6	\$2
13.	\$9	\$2
14.	\$13	\$1
15.	\$20	\$2
16.	\$30	\$2
17.	\$45	\$2
18.	\$67	\$1
19.	\$100	\$0

A HIGH (H) number hasn't come up for 7 spins, so now you proceed to bet on that field (H) until it does come up. And then you win! It's that simple. You break the "law of averages" into pieces.

This table is the number sequence you will be betting with. Remember, start betting on the 8th spin, after 7 spins have been rolled and one of the three fields have not fallen in (appeared) H, M, or L.

Remember, this is just the beginner stage of the system.
In the advance stage, you make 15x the money!
Try this stage first to get the hang of it.

Continue recording what numbers fall, you can continue on the same table after you have won.

Once you have won and your field comes up, STOP betting again and wait for another consecutive run of 7 spins without a certain field H,M, L showing up...

So after 7 spins in a row, with one of the area's, either H, M or L, not appearing,,, then you start betting: for example say you won on spin 11, that would mean you lost on spin 8, 9 and 10, but when you win on 11 you make up for all that you lost on 8,9 and 10, plus you make an extra \$2. So you are always winning and ending up ahead for each round. You can get many rounds in an hour, that is why this ad's up so fast!

Remember the only way you can lose is if the field you're betting on doesn't come up for 19 consecutive spins, and to make it clear, you have broken the "law of averages" and gained a 160% advantage! That means you will win 160% of the time, I don't see where you could go wrong! Just make sure to follow my directions exactly and ask for help or read the commonly asked question book. Email me if needed Questions@easyfreeincome.com

Before we proceed to the *ADVANCED STAGE* of the system, I would like to tell you how to deposit money, receive the bonus and a few tips about the casino!

This casino has 24/hour help, live chat or phone support.

I recommend using your credit card, as it is fastest and easiest. They have many forms of payment though. Net teller, Fire pay, bank transfer, credit card, etc....

As soon as you make a deposit it takes about 2 minutes to go through and then they automatically give you your bonus and you're ready to play with double the amount that you put in!

One excellent thing about this casino is, they do not charge you anything to cash out. Most casinos will charge you almost \$30 to cash out or make you cash out only when you have reached a minimum balance. This casino has great staff and very player (customer) friendly rules!

My Rules:

- Change tables after every 15 to 20 minutes. (bottom/right)
- Don't get Greedy... Stick to the numbers I gave you.
- Set a limit for yourself. I chose \$400 a day.
- I find the casino is easier between 6am- 11am and 4pm-2am
- Review your numbers if you ever get confused, on the number display on the top left corner of the roulette screen.
- Always play European roulette, you increase your advantage because it only has one 0. This casino only has European roulette so don't worry. (Don't use the "live" roulette, its too fast in real time)
- Do not count 0 as a spin when recording your H,M, L just pretend it did not happen.
- make sure you grab your chips and pull them back before starting another sequence.
- Stick to the rules and turn your \$100's into \$1000's, enjoy kick back and make money!
- Make sure you always choose a private table. Also play in the regular \$1-\$300 table for beginner stage, and \$5-\$500 for advanced.
- Email me if you have a question Questions@easyfreeincome.com
- Read the "commonly asked questions" book on the download page.

ADVANCED SYSTEM

This is where you make the big \$\$\$

You need a balance of at least \$300 to play the beginner system and a casino bank balance of at least \$600 to play the advanced system.

You can use the beginner system to gain the money to play the advanced system, or you can go straight to the advanced by depositing the remainder to be able to play the advanced system.

Here you will be playing the same way, but with a new set of numbers (with higher return) and another way of recording your sequences and doubling your chances of success.

REMEMBER THIS

Your Advanced system is based on a certain field not coming up for 9 consecutive spins, meaning you bet on the 10th spin.

This is your **ADVANCED** table

Bet in this sequence to make \$4 to \$20 a win

Spin #	Bet This Much	You Make
10.	\$10	\$20
11.	\$14	\$18
12.	\$18	\$12
13.	\$27	\$12
14.	\$41	\$13
15.	\$61	\$12
16.	\$90	\$9
17.	\$135	\$9
18.	\$200	\$4

Do the same thing you were doing before, only don't bet until you spin 9 consecutive spins without a field H,M,L coming up. Place a bet on the 10th roll.

Then stop at a win and start over, same as before!

This is how to win **\$100 an hour** and make **\$400 a day** by playing by these rules.

Who do you know that makes \$100+ an hour and doesn't have to leave home? Well now you know someone..... **YOU!**

OK now I have one more awesome way for you to actually double your chances of winning and double your odds of a field not coming up for the amount of consecutive spins that you need before betting.

This is called “Column Betting”... your first system was based on “Dozen betting”

So in addition to your “Dozen Betting” You will add “Column Betting”. To double your chances, and not have to sit around and wait so long for one of your sequences to appear.

This is how “Column Betting” is done:

You will now also be watching for 1st, 2nd, 3rd, to have a consecutive run without one of the columns (fields) appearing. Whether it be 1st, 2nd or 3rd.

Use the same piece of paper you’re using for H,M,L and either draw a line down the page vertically, or split the page in half horizontally. You will be keeping track of two different runs now.

They show 2 to 1 on them, because that’s the win.... Remember bet \$10 make \$20, even though your return will be \$30, but the original \$10 was already yours, so you pocket \$20

This is a bet on 1st: Still 12 numbers 36,33,30,27,24,21,18,15,12,9,6,3

This is a bet on 2nd: 12 numbers 35,32,29,26,23,20,17,14,11,8,5,2

This is a bet on 3rd: 12 numbers 34,31,28,25,22,19,16,13,10,7,4,1

Just follow all the same direction for H,M,L and it will work the same way for 1,2,3.

So if you roll:

34, 36, 20, 18, 3, 7, 24, 30, 31, 16, 1, 24

Your 1,2,3 section of your paper would look like this:

3, 1, 2, 1, 1, 3, 1, 1, 3, 3, 3, 1

Notice the number **2** hasn't come up in 9 spins, you can now place a bet using the advanced table system of this guide.

Use this picture for reference to help you understand better. You can see where the numbers are placed. Either in 1,2,3.

This is one of the only casino's that you can spin the wheel without placing a bet first. But in some cases, they will require you to bet to spin the wheel. So in this case we must improvise by betting \$1 on red and black to spin the wheel and watch for our sequence to appear.

(Ok so let's say you have to bet to spin the wheel, so to avoid losing any money, you are going to place a \$1 bet on RED and a one \$1 bet on BLACK, like this!

This way, we know either red or black will win, so it balances out and you don't lose or win, while your spinning to find your sequence and watching the wheel!

(You have to bet \$1 on red and black, because some people say the casino requires them to bet something to be able to spin the wheel. So try and spin without placing \$1 on black and red, and if you can still spin without betting, then you are in luck!)

One more trick from me to you:

After you feel confident about using the prior strategies, try this:
When you are betting in order of the stakes \$ in the tables that I gave you, and it takes more than 5 bets (spins) to get your win, (meaning you won from spin 14 or higher) then after your win just keep on betting on the same field, only \$5 at a time though, and most of the time make an extra \$20 from doing that on each win!

I win the sequence playing "Middle", off of spin 14 in the ADVANCED system, which the bet is \$41 and I made \$13 dollars on that sequence.

Since it took so many spins for my "Middle" to appear, it's more likely that it will appear again on the next spin.

I often do this technique, sometimes you will lose the \$5 so then you just stop and continue looking for your sequences, but often the “Middle” or whatever field I’m playing, will appear 4 or 5 times in a row after that, so I just keep on betting \$5 until I lose the spin and I start over.

The previous tip, is just a tip, something that works for me! So if you want to be very cautious, just use the systems and you will be fine!
