## Adjustable Precision Shunt Regulators

December 2001

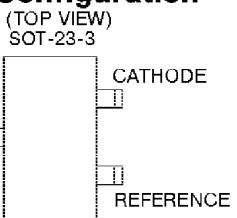

### FEATURES

- Low voltage operation (down to 1.24V)
- Wide operating current range 80 $\mu$ A to 100mA
- Low Dynamic output impedance 0.05  $\Omega$  typ.
- Available in SOT-23-3, SOT-23-5 and TO-92 packages

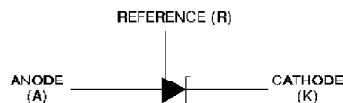

### DESCRIPTION

The AS431 are three-terminal adjustable shunt regulators with specified thermal stability. The output voltage may be set to any value between  $V_{ref}$  (approximately 1.24V) and 16 V with two external resistors. These devices have a typical output impedance of 0.05 $\Omega$ . Active output circuitry provides a very sharp turn-on characteristic, making these devices excellent replacements for zener diodes in many applications.
